Description	Price
Software with an empty database with free lifetime upgrades and assistance. The database could be configured optionally with the digital map of the cemetery, prepared by the purchaser by using the rules described here: http://www.digitalcemetery.info/map_drawing.htm The software can be used without a digital map, but we strongly suggest to add it for a better user experience. If you have a map in a CAD format and/or you are able to create it, for example starting from a paper map, based on the rules described in the web site, we can help you in this process, this service is included in the assistance.	$ 349
Drawing the Map If you are not able to create the map of your cemetery our company can draw the plan starting from your scanned papers, but the quote for this service depends by the quality of the documents and the complexity of the cemetery. We need to know: • the number of the cemeteries to map, the size, the number of plots to draw, the address if possible • if there isn't a paper map we need to know the address of the cemetery to get its coordinates and check the quality of the view on Google Maps, to understand if the screenshot taken from Google Maps can be used as a background image. The final cost is calculated after having seen the docs. The final result is a "ready-to-go" setup.	Starting from $ 200
Importing Data Digital Cemetery includes the feature to import data (deceased, owners, purchase agreements) from an Excel file based on the rules described here: http://www.digitalcemetery.info/excel.htm In the Excel file you can associate the GPS coordinates of each single tomb. If the Excel file matches our requirement we are able to build a "ready-to-go" setup.	$ 100

Preparing the Excel file If you are not able to write or convert an Excel file to import the data in the database our company can create/process it, but the quote for this service depends by the structure of the source archive. The final cost (including the importing step described above) is calculated after having seen the docs.	Starting from $ 100

We remain at your disposal for any request or doubt.
